EnSave Presents at American Agricultural Economics Association Meeting

Richmond, VT, July 28, 2008

EnSave is pleased to announce that CEO Craig Metz and Government and Special Projects Coordinator Lynn Knight recently presented at the 2008 American Agricultural Economics Association (AAEA) annual meeting, held July 27-29th, in Orlando Florida.

While in attendance, Lynn Knight moderated the symposium *Agricultural Energy Conservation and Efficiency*. During this same symposium, Craig Metz presented on two topics, "The Energy Pyramid" and "Pay for Performance Energy Efficiency Programs".

The symposium addressed how skyrocketing energy costs have elevated the desire of many agricultural producers to conserve energy. It also discussed how government policymakers must keep in mind not only agricultural producers but the American public when developing energy policies.

The AAEA represents economists who study of the economic forces that affect the food and fiber industry. Specific areas of study in agricultural economics include community and rural development, natural resource and environmental economics, and agribusiness economics and management. Agricultural economists can be found at every level of business, government and education around the globe

For more information on the AAEA, please visit <http://www.aaea.org/>.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation's resources. EnSave's clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America's land, air, and water.
