

“EnSave was there when we needed a partner to help solve our agricultural customers’ energy efficiency needs. With EnSave’s detailed farm energy audit reports, our customers are able to make informed decisions about installing energy efficient equipment. EnSave wants what WPS wants for our Ag customers—solutions to their energy needs.”

—Rob Ash, Wisconsin
Public Service Corp

EnSave knows Agriculture. It has worked exclusively in the agricultural sector since 1991, bringing energy efficiency and pollution prevention solutions to its corporate, government and non-profit clients. EnSave customizes its consulting solutions for each client’s needs.

Surveys

EnSave uses surveys to help clients achieve a variety of objectives. EnSave can help its clients further identify:

- Unique energy needs
- Sub-sectors of agriculture (dairy, swine, beef, etc.)
- Energy and demand savings potential
- Dealers that serve farm customers
- Utility incentive or loan fund interest
- Sources for renewable energy
- Market potential

Marketing

It can be challenging to reach producers with information about energy programs. This is because they are scattered throughout large geographical areas and busy with the farm operation. EnSave knows how to reach farmers and food processors and can help them navigate their way through a rebate or grant program.

Training

EnSave has provided agricultural energy efficiency training to a wide audience including utility field personnel, equipment manufacturers, equipment dealers, utility commissions, cooperative extension agents and resource conservation and development councils. Training is tailored to the specific needs of EnSave’s clients.

Consulting

EnSave has assisted a wide range of clients with special projects. Clients have included:

- USDA (United States Department of Agriculture)
- EPA (United States Environmental Protection Agency)
- Investor-owned utilities
- Rural electric cooperatives
- Public benefit corporations
- Public utility commissions
- Resource Conservation and Development Councils
