

Save Energy and Money

with Your **Free** Engine Block Heater Timer(s)!

Efficiency Vermont

EnSave

What is this program?

Efficiency Vermont and EnSave have teamed up to promote the use of timers for engine block heaters used on farm vehicles during the winter months. Farmers can receive up to four **free** timers.

Why use a timer on my engine block heater?

Most farm vehicles need to have warm engine blocks in order to operate effectively. This is critical during the winter months when you rely on your vehicles or equipment for early morning start up. Use of a timer on engine block heaters allows the heaters to run for just a few hours each morning prior to use of the farm vehicles, rather than having the (electric) engine block heaters running throughout the night consuming electricity. **Using timers reduces electricity consumption and, therefore, reduces your electric bill.**

Qualifying equipment / terms and conditions:

Tractors, skid steers, trucks, and generators all qualify for the program. Call EnSave with questions concerning other equipment. To ensure that timers are installed properly, participating farms *may* receive a phone call or an in-person site visit. Timers are free to qualified participants. Qualified participants are: Vermont farm owners or operators who submit all application information requested. **It's that simple!** Applications received will be processed on a first come, first served basis. Timers will be sent by U.S. mail within 30 days of receipt of a completed application. Program may change without notice.

How to get your timers:

Completely fill out and mail the attached application card. Ensave will process your application and mail you your timers.

“I have my timer plugged into an IH Diesel, and it works just wonderfully! I can see where it will really save a lot of electricity.”

RICHARD JOHNSON, FARMER

ensave.com

Yes! Send me up to four **free** engine block heater timers for farming equipment engines. I will install my timer(s) on the following equipment (tractors, skid steers, trucks, generators):

Equipment (year, make, model)	Hours plugged in per night	Block heater is typically used (start date & end date)	Wattage of block heater
Example: 2001 John Deere 5420 tractor	8 hours per night	November 1 – April 15	1,800
1.			
2.			
3.			
4.			

I certify that the information on this application is correct and that I will install the equipment as intended. I further agree to allow a representative of EnSave or Efficiency Vermont to telephone or visit the farm to perform a spot check to ensure the timer(s) is (are) installed and operating properly.
