EnSave to Exhibit at California Agricultural Conferences

Richmond, VT, February 3, 2009

EnSave is proud to announce their attendance at the upcoming World Ag Expo and Western United Dairymen conventions, both to be held this February in California.

The World Ag Expo will be held February 10–12, 2009 in Tulare, California. EnSave will be located in the Dairy Pavilion at booth 6238. Field Manager Ravi Parikh and Audit Specialist Corey Conant will be available to answer questions about energy efficiency and the agricultural industry.

The Western United Dairymen Conference will take place March 4–6, 2009 in Robert Park, California. EnSave is proud to be a Silver Sponsor once again, and can be found at booth 28. Field Manager Ravi Parikh will be on hand to answer questions about energy efficiency and the dairy industry. He will also be on hand to sign up qualifying dairy producers for our latest California project, the Dairy Energy Efficiency Program.

“Both of these conventions play a key role in EnSave’s success in California,” said Mr. Parikh. “California is the top agricultural producer in nearly every category; these conferences give up an opportunity to see the latest technologies but also to talk to producers face to face. It gives us a chance to hear what they need, and to find solutions to their energy problems.”

If you would like more information regarding EnSave’s participation in these conferences, or to learn how EnSave can help find solutions to your energy problems, call (800) 732-1399.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation’s resources. EnSave’s clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America’s land, air, and water.
