**EnSave Attends American Council for an Energy Efficient Economy
Forum on Agriculture**

Richmond, VT, February 22, 2008

EnSave, Inc. CEO Craig Metz and Program Development Manager Amelia Gulkis recently attended the 2008 American Council for an Energy Efficient Economy (ACEEE) *Forum on Energy Efficiency in Agriculture*, held February 20-22nd, in Des Moines, Iowa. In addition, Ms. Gulkis was part of the planning committee for the conference.

The focus of this forum was *Food and Energy from the Ground Up: Efficiency's Role in Sustainable Agriculture*. While in attendance, both participated in two sessions. In the first session, "Best Utility Program Practices", Craig Metz presented *A Trans-Continental View of Ag Energy Efficiency Program Strategies*. The second session, "Farm Energy Audits", which Mr. Metz moderated, included a presentation from Amelia Gulkis entitled *Farm Energy Audits: Challenges and Opportunities*.

"This was an exciting opportunity for us to discuss energy efficiency in agriculture," said Amelia Gulkis. "There is so much that can be learned from this process, and the more we can share the more the farmers will benefit in the long term."

In 2005, EnSave received the ACEEE *Champion of Energy Efficiency Award*. For more information on the ACEEE, please visit <http://www.aceee.org/>.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation's resources. EnSave's clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America's land, air, and water.
