EnSave Becomes Technical Service Provider

Richmond, VT, August 6, 2009

EnSave is please to announce that it has become a registered Technical Service Provider (TSP) with the USDA to provide Agricultural Energy Management Plans (AgEMPs).

AgEMPs are funded through USDA's Natural Resource Conservation Service's Environmental Quality Incentives Program, or EQIP. The AgEMPs include an energy audit of the operation's headquarters. These audits identify resource concerns, such as soil erosion and water quality, and make recommendations to address the resource concerns found. Funding to address these concerns could be funded through EQIP in future sign-ups.

While agricultural producers are able to go through their local NRCS office to have the AgEMP performed, hiring a TSP instead often means quicker service. EnSave is registered to provide headquarter AgEMPs, and has a pricing schedule available.

As a provider of over 2,000 farm energy audits to agricultural producers across the United States, EnSave is uniquely positioned to provide quality energy audits for this program. They will talk with each producer before performing the audit to ensure an AgEMP is right for them and work with their schedules to ensure the process is quick, professional, and easy.

If you are interested in receiving an AgEMP, please call EnSave at (800) 732-1399.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation's resources. EnSave's clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives.
