EnSave CEO Attends *Harvesting Clean Energy* Conference

Richmond, VT, February 3, 2009

EnSave CEO Craig Metz recently attended the *Harvesting Clean Energy* Conference, January 25-27, 2009 in Billings, Montana.

While attending the conference, Mr. Metz gave a presentation entitled “Energy Audits, Saving Money and Energy on the Farm.” The presentation discussed how farm energy audits work, and how producers can save money and energy through conservation and energy efficiency.

“When looking to reduce costs on the farm, every little thing helps,” said Metz. “Adjusting the heat and turning off the lights when they aren’t in use are little changes that add up quickly. Making sure your equipment is well-maintained and regularly cleaned increases its efficiency and will ensure it lasts longer.”

Mr. Metz also discussed the benefits of farm energy audits. These audits review a farmer’s energy and fuel usage and recommend steps farmers can take to reduce the amount of fuel and energy used, while maintaining (and sometimes increasing) productivity. EnSave has provided over 2,000 farm energy audits across the United States.

If you would like more information on farm energy audits, or would like EnSave to speak at your function, please call (800) 732-1399.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation’s resources. EnSave’s clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America’s land, air, and water.
