**EnSave Signs Memorandum of Understanding with
National Association of Conservation Districts**

Richmond, VT, February 8, 2008

EnSave is pleased to announce its partnership with the National Association of Conservation Districts (NACD).

The purpose of the Memorandum of Understanding (MOU) is to provide a framework of cooperation at the National level for the conservation districts and EnSave to encourage the exchange of education and information between the two organizations through their respective outreach efforts.

This partnership was created to develop programs that advance the conservation mission of each organization, with a focus on agricultural energy issues. As part of this agreement, EnSave will be providing energy audits to agricultural producers within local conservation districts. EnSave will also train and certify local NACD staff to become data collectors. Once trained, the data collectors will visit area farms who have signed up for energy audits to collect information on the farm's energy usage patterns. EnSave will also provide technical assistance and design energy efficiency programs for area conservation districts as requested.

“This is the beginning of a wonderful partnership,” says EnSave CEO Craig Metz. “With our mutual goal of bringing energy efficiency to America’s farms, both EnSave and the NACD can benefit from the others’ expertise.”

For more information on the NACD, please visit <http://www.nacdnet.org/>.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation’s resources. EnSave’s clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America’s land, air, and water.
