Richmond, VT. August 19, 2005

The American Council for an Energy Efficient Economy (ACEEE) named EnSave one of its three champions of energy efficiency for 2005. The award was presented July 20 at the Summer Study on Energy Efficiency in Industry held in West Point, New York. The ACEEE selected EnSave for its leadership and innovation in the design and delivery of energy efficiency programs for America’s farms.

“We have been working to save energy for America’s agricultural sector since 1991, and it’s wonderful to see our work recognized by our peers in the industry,” said Craig Metz, EnSave’s Director of Program Development. “This award means a lot to us because it highlights the importance of agriculture, and how America’s farms can continue to thrive through energy efficiency.”

The ACEEE noted that though the energy savings for an individual farm may be small, EnSave’s aggregation of many farms is able to help a wide cross-section of America’s farms and the rural communities in which they operate.

About EnSave:

EnSave supports the American agricultural sector with innovative energy conservation and pollution prevention programs. EnSave provides agricultural producers and food processors with cost-effective ways to reduce operating costs while saving energy and reducing pollution. EnSave’s clients include state and federal energy agencies, investor-owned utilities, rural electric cooperatives, and state and federal environmental agencies. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs encourage economic investment in the rural economy and improve the quality of America’s land, air, and water.
