EnSave CEO presents at the *Simple Ways to Save \$\$\$ on the Farm* Symposium

Richmond, VT, January 20, 2009

EnSave CEO Craig Metz recently traveled to South Carolina to present at the South Carolina Soil and Water Conservation Society's *Simple Ways to Save \$\$\$ on the Farm Using Energy Conservation* Symposium. The symposium kicked off the larger "Farming for our Future" Conference, January 14-16, 2009.

Mr. Metz gave a presentation entitled *Energy Audits and Your Farm*. He addressed how farm energy audits work, how to save money through conservation and energy efficiency, and how to implement an energy efficiency program in South Carolina.

Farm energy audits review a farmer's energy and fuel usage and recommend steps a farmer can take to reduce the amount of fuel and energy used without sacrificing productivity. EnSave has provided over 2,000 farm energy audits across the United States.

"Saving money on the farm doesn't take a huge investment; it can start with simple things like turning off the lights when you leave the room," says Metz. "Farm energy audits are an excellent way to learn how to save money on a farm. But even the little things like turning the heat down to 67 instead of 72 add up quickly."

If you would like to know how EnSave can work with you to provide energy efficiency programs, call us today at (800) 732-1399.

About EnSave:

EnSave supports the American agricultural sector with innovative energy efficiency and resource conservation programs. EnSave provides agricultural producers and food processors with cost effective ways to reduce operating costs while saving energy while conserving our nation's resources. EnSave's clients include state and federal energy and environmental agencies, investor-owned utilities, and rural electric cooperatives. EnSave implements its programs by developing relationships with equipment manufacturers, local equipment dealers, and the local agricultural community. Ultimately, these programs promote economic investment in the rural economy and improve the quality of America's land, air, and water.
