

# Do You Need an Ag Energy Management Plan?

## Are you looking for a Technical Service Provider?

USDA Natural Resources Conservation Service (NRCS) offers Agricultural Energy Management Plans (AgEMP). An AgEMP identifies ways you can save energy on your farm, saving you money over time.

EnSave is a technical service provider (TSP) able to perform AgEMPs. As the nation's leading agricultural energy efficiency company, we know agriculture, and we know energy.

## Why Hire EnSave?

- **Experience:** We are the leader in agricultural energy efficiency throughout the United States. We have provided more than 2,000 agricultural energy audits to all types of farms since 1991.
- **Free Initial Consultation Service:** The AgEMP needs to work for you. EnSave will talk with you during a free initial consultation to make sure you will receive guaranteed energy savings.
- **Easy Enrollment Process:** We have a streamlined process for delivering your AgEMP, working within your schedule.
- **Reasonable Pricing Structure:** EnSave has pricing scenarios available for headquarters and landscape audits. Reimbursement through NRCS may vary from State to State.
- **Proven Results:** EnSave has worked with Farm Bureau, Conservation Districts, Utilities, State Energy Offices and others to provide energy efficiency services to the agricultural sector.

## We Look Forward to Helping You!

“I have been in the dairy industry for over 30 years. I have received reports and audits from banks, feed companies, government farm agencies, etc., and I have never read a report that was so impressive and informative as yours...”

—Craig Stevens, Dairy Farmer, New York State
